## PA0092-P- PRESSURE RELEASE VALVE

Bookmark Print

from [TLX TECHNOLOGIES, LLC](#)

TLX Technologies LLC offers the PA0092-P high temperature, (500F/300C), high pressure, on/off valve to reduce engine cylinder compression during startup.

- Valve's center poppet extends to route transient pressure thru the radial exhaust holes then closes when engine fires
- High tolerance for temperature shock, vibration
- Encapsulated coil, silicone-jacketed harness
